ENERGY EQUITY & INCLUSION

Expanding Access to Affordable Fuel for Marginalized Communities

Energy Equity and Inclusion Expanding Access to Affordable Fuel for Marginalized Communities

Problem Statement:

How can Hindustan Petroleum Corporation Ltd. (HPCL) expand access to affordable and equitable fuel supplies for marginalized communities, ensuring that underserved populations have reliable access to energy for essential needs like cooking, heating, transportation, and local industry? Proposals should focus on innovative distribution models, affordable pricing strategies, and partnerships that ensure inclusivity and sustainability.

Subsections to explore:

- Models for increasing availability of clean fuels (LPG, CNG, biofuels) in remote and low-income regions
- Strategies for making fuels more affordable (e.g., through subsidies, micro-distribution networks, or innovative business models)
- Collaborations with local communities to manage and ensure fairness in fuel distribution
- Solutions that maximize the economic and social benefits of equitable fuel access

Deliverable:

Participants are required to submit a **2-slider PowerPoint presentation**, organized as follows:

Slide 1: Overview of the proposed solution, focusing on the distribution model and strategies to increase the availability and affordability of clean fuels for marginalized communities. Highlight innovative approaches such as micro-distribution networks, subsidies, or local partnerships.

Slide 2: Implementation roadmap, illustrating how the solution can be deployed in underserved areas, with an emphasis on ensuring inclusivity, fairness, and cost-effectiveness. Discuss how the proposal will contribute to improving the economic and social wellbeing of marginalized communities through equitable fuel access.

Optional: A **2-minute pitch video** summarizing the solution, demonstrating how it bridges the gap in fuel accessibility, making energy affordable and available for all, especially for marginalized populations, regardless of geography or income level.
